

How to Win on The Greyhounds and have enjoy Entertainment and Profit.

By Steve Davidson.

Welcome to this very good way to have the dogs pay you to be entertained.

The figures are for Australian Racing.

Essentially it is designed to be used with our Greyhound Dutch Traps bot, however if you want some work, it could be done manually, but frankly the effort is time consuming, and **the bot is not**.

The bot will do it with minimum interference.

OK, there is the method.

Now, I have used it mostly on the Australian dogs, but have started looking at the UK dogs and will show you, my results.

As you can see only one losing day so far.

This is a straightforward plan; we are looking at winning 1.00 unit when we get a successful dutch.

We are averaging a 61% strike rate on the settings we are using. Over 500 races to date.

The Rules:

1. Only the two dogs are considered, and the odds minimum is 2.50 on the fave, and no more than 5.00.
2. Minimum runners are five.
3. Maximum dutch percentage on the two dogs must be 80% or less.
4. Staking is Stop a Profit, so we are aiming to win 1.00 clear profit after staking, including previous losing stakes. And to allow for commission if you are using exchanges.

5. We have a stop loss should we have a losing run. We set that at 50 times the target. So, if you have a 1.00 profit target then 50.00 would be your stop loss figure. If you hit stop loss, then you can restart and book the loss.
- 6.

Here are the bot settings to make 1.00 profit every winning dutch.

This method can be run on the Greyhound Dutch Traps bot.

I use in on Australian Racing.

UK results are not that good.

00.

See more here www.back1-4.com

This staking is not offered in the Greyhound Dutch Traps, but you just change the stop@profit per race to 2.00 and double the stop loss figure.

You can use the Back 1-4 on a daily bases, where you increase the stop profit target after a losing day.

See the graph below on Australian racing using it on a daily bases.

June 2023 Dutching Top 2 Dogs in Australian Racing
 Target 1.00: Back 1-4 Staking : Profit 489.80

Days	Daily	Growth
⊕ 01-Jun	33.30	33.30
⊕ 02-Jun	69.80	103.10
⊕ 03-Jun	41.10	144.20
⊕ 04-Jun	-95.90	48.30
⊕ 05-Jun	319.00	367.30
⊕ 06-Jun	54.10	421.40
⊕ 07-Jun	46.80	468.20
⊕ 08-Jun	21.60	489.80
Grand Total	489.80	

Stake 2 units

After 4th June, we increased to 2.00 target as the day was a losing one.

On the 5th using 2.00 target we made **319.00 profit**, so we dropped back to 1.00 target.

OK, that is just a few ways to use in our GreyhoundDutchTrap Bot.

Thanks for downloading the pdf, hope it helps you make some money and have some great entertainment also.

I love using this bot, I have the racing on TV on one screen and the bot in the corner and watch the races roll through and the bank grow.

Please feel free to email this pdf to your friends, may get a few together and start a betting syndicate on the greyhounds.

I know what you are thinking will it work on horses? Yes, I am looking at that also.

Thanks again.

Cheers

Steve and Michael.
